

PLASTIC SURGERY AUSTIN
Sanjay K. Sharma, M.D., F.A.C.S.

How To Take Care Of Your Pin Site

1. Therapy will remove the post-surgical dressings and perform the first pin site cleansing.
2. Remove the dressing from around the pin site. Remove your splint if necessary.
3. Use a Q-tip to apply hydrogen peroxide to the pin where it exits the skin.
4. Put a clean dressing around the pin site and put your splint back on.
5. Perform care daily or if dressing or pin site becomes dirty.
6. Do this once daily, or more often if you think the pin site may have gotten dirty.
